

- i. **Introduction** - describing the background of the work and its aims.
 - ii. **Materials & Methods** - a brief description of the methods/techniques used (the principles of these methods should not be described if readers can be directed to easily accessible references or standard texts).
 - iii. **Results and Discussion** - a clear presentation of the results obtained, highlighting any trends or points of interest.
6. **Conclusions:** a brief explanation of the significance and implications of the work reported.
 7. **Acknowledgement:** a brief acknowledgement of funding bodies or individuals, who contributed but is not among the authors.
 8. **References:** these should be to accessible sources. Please ensure that all work cited in the text is included in the reference list, and that the dates and authors given in the text match those in the reference list. References must always be given in sufficient details for the reader to locate the work cited (see below for the formats).

The maximum page limit for full papers submitted to the ICETMSST 2023 is eight (8) pages of A4 size. It is essential that all full papers comply with the format requirements as explained in this paper template.

Figures and Tables

Figures and tables should be numbered consecutively as they are presented (Figure 1, Figure 2, etc. and Table 1, Table 2, etc.). A descriptive caption, including the figure or table number in boldface followed by a full stop, should be placed directly above tables and below figures. Table 1. This is an example of table layout. Note that a minimum number of horizontal rules and (usually) no vertical rules are used.

Table 1: Compressor specifications for Dyeing plant

Identification	Type	Power consumption (kW)		Capacity of Air delivered (m ³ / min)	
		Rated	Actual	Rated Air flow	Actual Air flow (FAD)
Compressor-1	Screw	11.0	7.37	1.47	0.79569
Compressor-2	Screw	11.0	7.50	1.47	0.88585

Callouts for each figure and table should appear in the text. Figures and tables should be positioned close to where they are first cited; we recommend (1) placement at the top or bottom of a page; and (2) not wrapping text around the figure/table, cf. Figure 1 and Table 1. Allow two-line spaces above/below tables/figures and make sure they fit inside the text area.

Figure 1: This is an example of a Figure layout. (Photograph courtesy of <http://www.mamgarments.edu.my/hr/edu.et>).

Keep figures as simple as possible for clarity: avoid unnecessary complexity, colouring and excessive details. The colours on Figure 1 do not cause problems when printing in black and white due to the simple graphical layout, but readers will not see the colours in the print. Illustrations should be clear and text in illustrations should not be written with less

1st International Conference on Emerging Trends in Mechanical Sciences for Sustainable Technologies
(ICETMSST 2023)
12th-13th of April, 2023
Sri Eshwar college of Engineering, Coimbatore

References (TNR 12pt., bold)

For each work shown in the list of references must be a reference in the text. All citations in the text and all references must meet APA styles (American Psychological Association 7th edition – more information <http://www.apastyle.org/>).
